

Fossil Evidence Analysis

Section 6: Fossils and Ancient Environments

Name: _____

Date: _____

Analyze fossil evidence to determine what we can learn about ancient organisms.

Fossil #1:

Type of fossil: _____ Organism type: _____

What we can learn from this fossil:

- What did the organism look like? _____
- How big was it? _____
- What did it eat? (if we can tell) _____
- Where did it live? (land/water/air) _____
- What environment was it in? _____

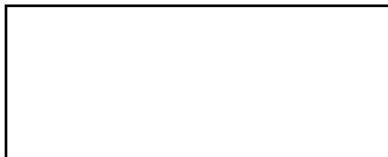

Sketch/Photo

Fossil #2:

Type of fossil: _____ Organism type: _____

What we can learn from this fossil:

- What did the organism look like? _____
- How big was it? _____
- What did it eat? (if we can tell) _____
- Where did it live? (land/water/air) _____
- What environment was it in? _____

Fossil #3:

Type of fossil: _____ Organism type: _____

What we can learn from this fossil:

- What did the organism look like? _____
- How big was it? _____
- What did it eat? (if we can tell) _____
- Where did it live? (land/water/air) _____
- What environment was it in? _____
